

# Supply Chain Performance Improvement

## Benchmarking, Best Practices and Brainstorming

- Benchmarks and Best Practices are readily available for each piece of the Supply Chain
- Benchmarking helps establish a potential for improvement and budget
- Best Practices offer a basis for brainstorming new initiatives that require custom fit solutions
- Initiatives and their Implementation plan built with management are the functions of an Assessment
- Facilitating successful implementation of initiatives is the work of the Improvement Project
- This includes developing dashboards that report weekly progress towards benchmarks
